

Visio 2007 Diagramming Business Processes - Online

Audience	This course is intended for the person who is very familiar with Windows features and is able to create, edit, and print drawings in Visio. This course is designed for those using Visio Professional.
Description	The course uses a combination of lecture and hands-on practice (with independent exercises after class) to build on the fundamentals taught in the basic Visio class. Students learn how to create, assign, and apply background pages and add fields, guides, graphics, and hyperlinks. In addition, this course covers creating business process diagrams such as organization charts, block, tree, and onion diagrams, flow charts, project management diagrams, and web site maps. They also create and apply a custom stencil, style, and template.
Objectives	Upon successful completion of the class, students should be able to: <ul style="list-style-type: none">■ Create and apply a background page■ Add fields to a text box and using title blocks■ Insert a graphic and hyperlink it to a web page■ Create, modify, and format an organization chart■ Create a synchronized copy of an organization chart■ Change the double-click behavior of a shape■ Create a variety of diagrams, a custom stencil, a style, and a template.■ Create business process diagrams such as block diagrams, flowcharts, organization charts, and project management diagrams■ Create a web site map
